LEADED GLASS AND GLASS MOSAICS

FOR THE DECORATION OF PUBLIC AND PRIVATE BUILDINGS

HOME OFFICE : 601 to 608 Chicago Stock Exchange Building

STUDIO : 27 and 29 South Clinton Street

CHICAGO

The Luminous Prism Company

Having offices in every large city of the United States, offers this catalogue of original designs for ornamental glass work and glass mosaics, to present to architects and others the possibility of obtaining a product of higher artistic value than can be obtained from small or local glass workers.

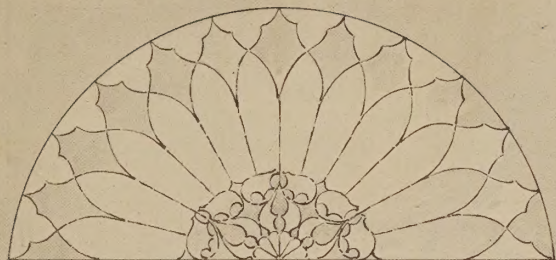

This Company has the most comprehensive ornamental-glass-working plant in the United States, engaged almost exclusively in making the very highest grade of artistic glass from special and original sketches. We reproduce a few of these designs to give a general idea of the merit of our work, both in the expression of specific style of design as well as varied schemes of color. These designs but inadequately show the beauty of our finished work, which is the result of a careful collaboration of artist and artizan, and the use of special materials exclusively our own. Consequently our work cannot be duplicated by others.

The necessary use of the most expensive materials and labor precludes our entering into general competition as to price. But where work of the highest artistic character and the best mechanical construction is desired, we have it to offer at the most reasonable cost.

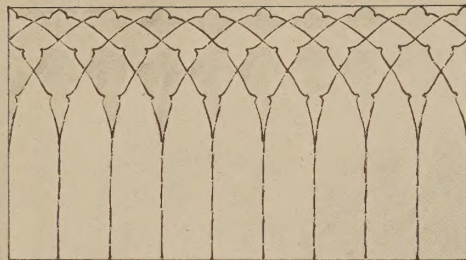

We shall be pleased to furnish designs at any time for work of a specific price, and solicit your correspondence.

Glass Mosaics...

Although a most valuable, is a most beautiful form of decoration.

It is absolutely non-absorbent and indestructable except from violence.

The unlimited range of color found in opalescent glass affords the widest field for either realistic pictures or conventional ornament. From the artistic side, glass mosaics are without a rival where permanency in union with color is desired.

We show on opposite page two examples of mantel facings, illustrating the old and new methods of working. We will furnish designs and estimates for vestibules, halls, wainscots and ceilings when requested.
